

Job announcement Bio 7/2018

The departments Biological Oceanography and Marine Chemistry of the Leibniz Institute for Baltic Sea Research Warnemünde (IOW) are offering (subject to funding of the project) a full-time (26 hours/week)

PhD position in Biogeochemistry/Marine Microbiology

at the earliest convenience/starting on the 01/01/2019 . Remuneration is paid in accordance with the TV-L salary scale at level EG 13 monthly gross salary. The employment is temporary for 3 years.

The IOW is an independent institute of the Leibniz Association, engaged in system analysis of coastal and marginal seas, with special focus on the Baltic Sea. The scientists of the four departments (Physical Oceanography, Marine Chemistry, Biological Oceanography and Marine Geology) cooperate within the framework of a joint research program.

Job description

The PhD candidate will work both in the groups "Microbial Ecology" and "Trace gas chemistry", and collaborate with other team members of the project EVAR (Effects of variability in physical forcing on carbon and oxygen budgets). The major task will be to investigate regulating mechanisms of trace gas production (N_2O , CH_4) in the Benguela upwelling system (Namibia) and to identify responsible microorganisms. In the frame of this project two expeditions with the research vessel Meteor of several weeks and accompanying laboratory studies with microbial communities at IOW are planned. The successful applicant will work closely together with two PostDocs addressing microbial community analysis and trace gas transport and flux.

Qualification

MSc in Biology, Chemistry, Geology or related field; good background in marine biogeochemistry and microbiology, experiences with process rate measurements and molecular/bioinformatics methods for microbial community analysis. Willingness to participate in research expeditions and to pursue research in an interdisciplinary framework.

Applicants are asked to send their complete applications (CV, copies of certificates, references) quoting the

Code: Bio 7/2018

Until **10/31/2018** to:

Applications of disabled persons with same professional and personal qualification will be treated preferentially. Please indicate a handicap in the cover letter and enclose the relevant certificate.

The IOW promotes equal opportunities and has been awarded the Total Equality Certificate in 2013 and 2016. An overview of our actions on gender equality and for improving the work-family balance can be viewed at <https://www.io-warnemuende.de/equal-opportunity.html>.

Applications of female candidates are expressly encouraged and will be treated preferably in case of equal qualifications and suitability.

The Leibniz Institute for Baltic Sea Research offers a varied work in the immediate vicinity of the Baltic Sea. Interdisciplinary research topics on the Baltic Sea ecosystem, broad in-house expertise in physical, chemical and biological oceanography, and marine geology, state-of-the-art-laboratory equipment and infrastructure together with modern facilities provide an excellent framework for best research conditions.

Application and travel costs cannot be reimbursed.
